

Creamos un Repositorio en bitbucket

moshe21 / pruebaunitaria / server_moshe / Repository settings

Repository permissions

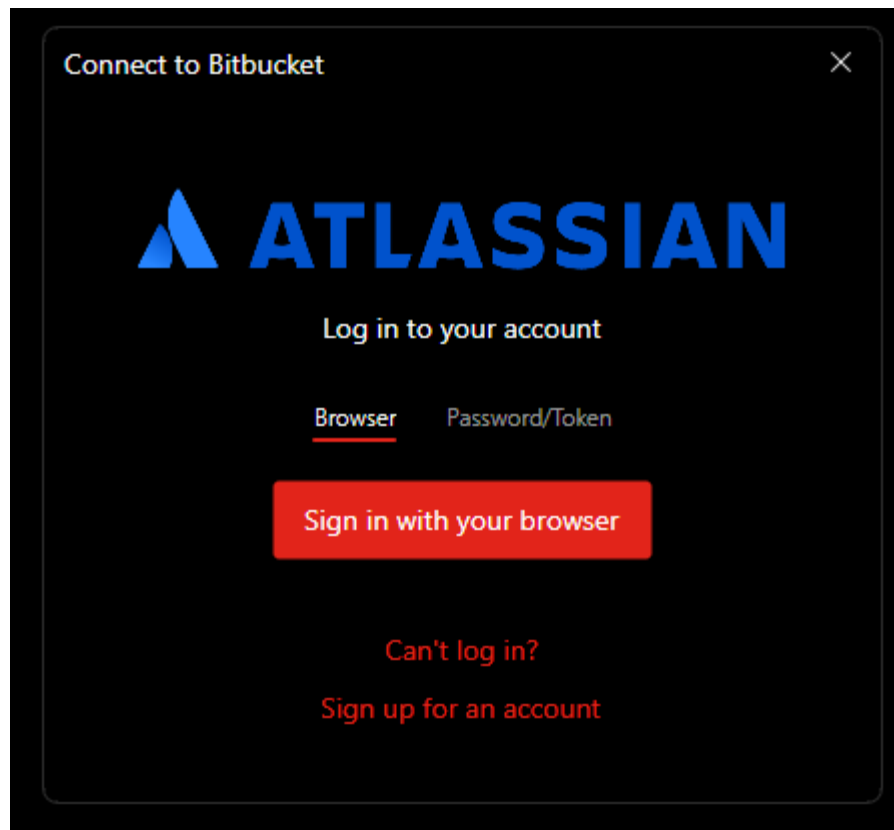

Repository permissions allow you to extend access beyond that already granted via [project permissions](#). In order for users to have [product access](#).

Search	Permissions	Access level
<input type="checkbox"/> Name	Permission	Access level
<input type="checkbox"/>  Moshe Zabaleta Moshe Zabaleta	Admin	Project

Clonamos el repositorio a git

```
RCC@HP1laptop15-ef2xxx MINGW64 ~ (master)
$ git clone https://moshe21-admin@bitbucket.org/moshe21/server_moshe
Cloning into 'server_moshe'...
```

Nos pide autenticar

Autorizamos el acceso

Confirm access to your account

Sourcetree for Windows is requesting access to the following:

Read and modify your account information

Read and modify your repositories' issues

Read and modify your workspace's project settings, and read and transfer repositories within your workspace's projects

Read and modify your repositories and their pull requests

Administer your repositories

Read and modify your snippets

Read and modify your team membership information

Read and modify your repositories' webhooks

Read and modify your repositories' wikis

By installing the App you agree to the [privacy policy](#) and [terms of use](#) provided by Sourcetree for Windows.

Creamos un código para imprimir “Hello World”

```
JS helloworld.js X
C: > Users > huval > JS helloworld.js
1 console.log('Hello, World!');
```

Ejecutamos el programa node js en bash

```
Node.js X Windows PowerShell X
PS C:\Users\huval> node helloworld.js
Hello, World!
```

package.json

```
File Edit Selection View Go Run ... curso-programacion-basica
EXPLORER
OPEN EDITORS
  JS helloworld.js C:\Users\huval
  X {} package.json C:\Users\huval
  > CURSO-PROGRAMACION-BASICA
  > OUTLINE
JS helloworld.js {} package.json X
C: > Users > huval > {} package.json > ...
